Mr. Alex Saunders
Executive Director
Canadian Psychiatric Association
Ottawa

24 November 1994

Dear Mr. Saunders,

This is simply to reiterate the concern that persons disabled by environmental sensitivities are being subjected to widespread physical and emotional abuse by psychiatrists.

As you may know I am particularly concerned that recommendations made by Mr. Perrin Beatty when he was federal health Minister, by the head of the Ontario Psychiatric Patient Advocacy Office, and by international award winning studies are being ignored, with the consequence that people are being subjected to ongoing horrific abuse.

It is truly a continuing tragedy that your organization will not help bring this abuse to an end.

Sincerely,

Chris Brown
